## Silicone Molds

### Fiber-Sil / Fiberglass reinforced flexible silicone molds

"Fiber-Sil flexible molds are crafted using a combination of fiberglass mesh and high-quality food-grade silicone. The fiberglass mesh we incorporate provides our molds with exceptional strength, durability, and unmatched non-stick properties, making them ideal for both baking and freezing. Furthermore, Fiber-Sil flexible molds facilitate optimal heat transfer, effortless demolding, and easy cleanup. In terms of longevity, our trays outperform traditional non-stick coatings, with each tray capable of withstanding 2000 to 3000 bakings. The number of uses can vary depending on the product.

To ensure the best results; Always place the mold on a perforated baking sheet or a grid before filling cavities and transferring to the oven or freezer.

#### Maintenance and Care:

- Clean with warm water and a soft sponge to remove any residue.
- Use a mild soap or detergent for thorough cleaning.
- Avoid using any grease or butter during use, as our molds are already non-stick.
- Recommended temperature range is between -70°C to 260°C.
- Never use knives or other sharp objects on the products."

**OCTAGON**  
 40 x 43 mm  
 Depth: 26 mm  
 400 x 600 mm  
 40 indents  
 Ref. S-101

**SMOOTH MAT**  
 550 x 350 mm  
 Depth: 11 mm  
 Ref. S-141

**ROUND**  
 Ø 45 x 34 mm  
 Depth: 19 mm  
 400 x 600 mm  
 48 indents  
 Ref. S-111

**HALF - SPHERE**  
 Ø 82 mm  
 Depth: 34 mm  
 400 x 600 mm  
 24 indents  
 Ref. S-131

**OVAL**  
 31 x 51 mm  
 Depth: 20 mm  
 400 x 600 mm  
 50 indents  
 Ref. S-121

**OVAL**  
 100 x 48 mm  
 Depth: 17 mm  
 400 x 600 mm  
 30 indents  
 Ref. S-123
