FIBERLAM 1001 Moderate weight / gas side PTFE film laminated expansion joint fabric

High quality woven fiberglass fabrics coated with a specially formulated fluoropolymer coating designed to provide enhanced flex properties and excellent high temperature performance, and then laminated with PTFE (Teflon) multilayer films to provide superior gas barrier properties.

Laminated barrier PTFE films reduce permeation of potentially damaging flue gases.

Permeation resistance

0.0 µg/cm²/minute - The FIBERLAM composite was investigated for permeation by an independent laboratory. Sulfuric acid 2N at 5 psig was used as the test medium. The FIBERLAM composite exhibited zero breakthrough and/or permeation. Test reports available upon request.

The product does not contain banned substances as described in RoHS directive and will not affect RoHS compliance.

This product has been manufactured in a facility certified by ISO 9001 Quality Management System.

Note: Nominal thickness, weight and tensile strength values are typical and are not intended as a specification minimum. Weight tolerance g/m² = ±%5 - Tensile strength tolerance -%10
