

1583

Product	Product category	Coating
PTFE GLASS FABRIC	HEAVY BELTING SERIE	PTFE

Properties	Metric		Imperial	
Standard width(s) <i>Please ask for other widths</i>	2600, 3200	mm	102.4, 126	inches
Thickness	0,65	mm	0.0256	inches
Weight	1150	gr/m ²	33.92	oz/sq yd
PTFE content	50	%	50	%
Tensile strength	4500	N/5 cm	514	lbs/inches
Temperature resistance	-150 to 260	°C	-238 to 500	°F

Fiberflon 1583 is a satin weave heavily coated fluoropolymer / glass belting material designed to provide a smooth surface with excellent non-stick performance. Special satin weave provides excellent tracking and minimum elongation to the belt for critical conveyor belting applications.

The product does not contain banned substances as described in RoHS directive and will not affect RoHS compliance.

Note: Nominal thickness, weight and tensile strength values are typical and are not intended as a specification minimum. Weight Tolerance g/m² = ±%5
 All technical data are based on average values. These values are not intended for use in preparing specifications. Technical information contained herein are based on test results FIBERFLON believes to be reliable, but they are not to be construed in any manner as warranties expressed.
